Preface

Our education system effectively provides a base for learning the English language and helps students to understand the underlying concepts of grammar and linguistics. In addition, this learning material provides the functional approach of language teaching, understanding and application of various concepts to students.

This workbook is designed to enable a holistic learning of the English language, and is an efficient tool to achieve comprehensive success in the ISFO – English Olympiad.

The main aim of this workbook is to assist students in developing and improving their ability to address questions on varying aspects of language learning.

This book consists of five sections for all-round preparation for the talent exams:

- **Section A (Vocabulary):** This section helps to develop various aspects of vocabulary, word order and punctuation.
- **Section B (Grammar):** Questions related to various concepts of English Grammar are included in this section. Students stand to gain in identification, understanding and analysis of the concepts.
- **Section C (Reading & Writing):** Here, students get to solve questions regarding a variety of reading comprehension passages in English. For effective communication, specialised expressions are used for different situations. This section helps practise these responses for various situations using appropriate expressions and inference of any statement.
- **Section D (BrainBox):** This section tests Higher Order Thinking Skills (HOTS) based on the entire syllabus.

Sample test papers for further practice and answer keys have been provided to augment the learning process.

Honeybees

Honeybees are smart little creatures. They live in hives made from wax. A hive has three kinds of bees: the workers, the drones and the queen. Every hive has one queen bee. The queen bee is the most important member of the hive.

Honeybees are known for working together. They work together to keep the hive healthy. Every bee knows its place and job in the hive. Some build and clean the cells of their hives and other gather nectar.

Worker bees are responsible for collecting nectar and pollen from flowers. Drones, on the other hand, do not work. They don't even have stings! Just before winters, they are driven out from the hive so that they do not eat up all the honey.
